Toward a Belgian National Assistance for Physicians in Acute Psychological Distress

Further development aims

- 1/ to make society aware of the risk of burnout, depression and suicide among physicians
- 2/ to facilitate discussion about psychological distress among physicians
- 3/ to draw attention to the medical students to this problem of increased risk of burnout, depression and suicide within the medical profession
- 4/ to facilitate scientific work about this problem

ARTS IN NOOD

Het programma "Arts in Nood", een project van de Orde van Geneesheren Oost-Vlaanderen, kan geactiveerd worden door een arts in psychische nood die er behoeft aan heeft een vertrouwensarts te contacteren. De vertrouwensarts geeft steun en toeverlaat aan de betrokken collega en probeert de arts te leiden naar een meer structurele oplossing van zijn probleem. De vertrouwensarts heeft absolute zwijgplicht. De dienstverlening is gratis.

Voor meer inlichtingen kan u steeds contact opnemen
met Arts in Nood via
